P. SHINE MANICURE PROCESS

Nail care by P.Shine will bring out natural beauty and makes your nails beautiful with brilliant luster.

For male and female, young and old, please share the joy of having one's own natural shine with your family.

Proper use for your nails

A. First use :

Normal nails in order of **0 1 2**.
Thin nails or children - in order of **1 2**.
※ Use according to the condition of your nails.

B. From second use :

Mainly care by **2** - 2 or 3 times a week.
Care by **1** - 2 or 3 times a month before **2**.

C. When nails grow, care by **0 1** to only new part of the nail where ridges become noticeable, and then **2** to whole nails.

When care is neglected for a long time, start from **0 1 2** or **1 2** according to the condition of your nails.

CAUTION

If you have nail enamel on your nails, remove it with enamel remover first.

※ If your nails are badly spoiled, we suggest you to stop using nail enamel for about 3 months and give massage to whole nails and nail roots with nail cream or hand cream every day. Massage will promote nail growth. When whole nails are renewed, start care by P.Shine.

The P.Shine Manicure Process is ideal as a base for colored nail enamel, if desired, although nails are beautiful enough without enamel and will have the appearance of having a beautiful smooth coat of clear enamel applied.

This manicure process is excellent for pedicure use, too.

※ Your fingernails grow at a rate of about 0.1mm a day. Nail care by P.Shine will encourage blood circulation and promote healthy growth.

Please read instructions carefully before use.

Printed in Japan

Implements used

0

Emery Paper

The pink side is for smoothing the surface.

The green side is for shaping.

1

Semi-dried Paste

Base polishing paste in the green bottle. Its effect does not change even after dried.

Green Buffer

Buckskin buffer for base buff with paste.

2

Powder

Luster-producing powder for finishing buff in the pink bottle.

Pink Buffer

Buckskin buffer for powder

3

Pusher

4

Wiper

Application

Smooth your nail surface by the pink side of the emery paper until whole nails have a whitish effect.

※ Do not use on thin nails or children's nails.

Spread small amount of the paste over the buffer with the pusher or else from end to end. Place it on your nail and buff well in big motion in **ONLY ONE DIRECTION** until the nail starts to shine.

Spread the powder over the buffer like the paste and buff up luster at pleasant pressure and speed. The more times your nails are buffed with the powder, the deeper and more brilliant the pink luster becomes.

※ When buffing the right hand fingernails, move the fingers stabilizing the buffer in the left hand.

For removing excess cuticles or cleaning back of the nails. Please use it after taking bath when cuticles are softened.

For cleaning your nails or emery paper.
